

SESSION SUMMARY

SESSION: 1 SEP88

VIEWER: OII

START: 1507

STOP: 1545

WE BEGAN THIS SESSION BY ADDRESSING THE SIGNAL LINE AS TO THE NATURE OF THE PROBLEM.

CUE: IDENTIFY THE PROBLEM.

RESULT: THE NATURE OF THE PROBLEM SEEMS TO BE SOFT, AIRY, GASEOUS, PUFFY, RISING, GREY, WHITE AND COOL. IT APPEARS TO BE CLOUD-LIKE AND IN MOTION. ONE PART OF THE PROBLEM APPEARS TO BE TALL, ROUND, CYLINDRICAL, METALLIC, AND TUBE-LIKE. ANOTHER PART OF THE PROBLEM CONSISTS OF INCLINES AND ANGLES. CONCEPTS ASSOCIATED WITH THIS PROBLEM ARE; TRIANGULAR, AS IF THERE ARE THREE PARTS WHICH ARE CONNECTED STRAIGHT LINES, OR LINES-OF-SIGHT. THERE ALSO SEEMS TO BE A DEVICE OF SOME KIND.

CUE: DESCRIBE THIS DEVICE.

RESULT: THERE IS THE CONCEPT OF A "BLACK BOX". THERE IS SOMETHING ANGULAR, PRISM-LIKE, ACTING AS A MIRROR, REFLECTING SOME SORT OF ENERGY, OR BEAM (AOL - LIKE A RADAR REFLECTOR). ALSO ASSOCIATED WITH THIS DEVICE IS THE IDEA OF RECORDING DATA.

CUE: DESCRIBE THE END RESULT.

RESULT: THERE IS SOME SORT OF ENERGY, OR VERY NARROW BEAM THAT IS AIMED AND FIRED AT A PRISM-LIKE DEVICE, THIS DEVICE HAS PRECISE, CRITICAL ANGLES AND SEEMS TO AIM/DIRECT THIS BEAM TO A TARGET. THERE MAY BE GREAT DISTANCES INVOLVED AND THERE IS A FEELING THAT THERE IS LITTLE MARGIN FOR ERROR.
